

TOWN OF WESTWOOD RECYCLING NEWS- NOVEMBER 2019

WE NEED YOUR HELP! WE NEED TO ELIMINATE CONTAMINATION

Recycling contamination continues to be a nationwide problem that is also affecting the Town of Westwood. Recently, due to load contamination, a portion of the town's recycling was downgraded at the recycling facility. The town is charged additional fees when the load is downgraded. Please help by keeping your recycling clean!

- Contamination in our recycling includes plastic bags, cords, food items, Styrofoam and baby items such as car seats.
- NO trash, food waste or plastic bags in your recycling.
- Only clean plastic bottles and containers; tin and aluminum cans; beverage cartons; paper; flattened cardboard; and glass bottles in your recycling barrel.
- Please visit the *town website* for recycling information and to use the Recycle Coach app.
