## **B. Findings**

Findings pursuant to the Town of Westwood Storm Water By-law:

Following the review of the above-referenced Application and based on the information provided in this application and presented at the public hearing, this Commission finds that the areas in which work is proposed is significant to the following interests of the By-law, chapter 350.

Furthermore, this Commission hereby finds the project, as proposed, is: (check one of the following boxes)

**Approved** subject to:

- The following conditions, which are necessary, in accordance with the performance standards, set forth in the regulations. This Commission orders that all work shall be performed in accordance with the Application referenced above, the following General Conditions, and any other special conditions attached to this Permit. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Application, these conditions shall control.  
**SEE ATTACHED SPECIAL CONDITIONS**

**Denied** because:

- The proposed work cannot be conditioned to meet the performance standards set forth in the regulations. Therefore, work on this project may not go forward unless and until a new Application is submitted which provides measures, which are adequate to protect these interests, and a Permit issued.
- The information submitted by the applicant is not sufficient to describe the site, the work, or the effect of the work on the interests identified in the By-law. Therefore, work on this project may not go forward unless and until a revised Application is submitted which provides sufficient information and includes measures, which are adequate to protect the By-law's interests, and a Permit is issued. A description of the specific information which is lacking and why it is necessary is attached to this Permit.

**General Conditions** (only applicable to approved projects)

1. Failure to comply with all conditions stated herein, and with all related statutes and other regulatory measures, shall be deemed cause to revoke or modify this Permit.
2. The Permit does not grant any property rights or any exclusive privileges; it does not authorize any injury to private property or invasion of private rights.
3. This Permit does not relieve the permittee or any other person of the necessity of complying with all other applicable federal, state, or local statutes, ordinances, bylaws, or regulations.
4. The work authorized hereunder shall be completed within three years from the date of this Permit.
5. This Order may be extended by the issuing authority for one or more periods of up to three years each upon application to the issuing authority at least 30 days prior to the expiration date of the Permit.
6. Any fill used in connection with this project shall be clean fill. Any fill shall contain no trash, refuse, rubbish, or debris, including but not limited to lumber, bricks, plaster, wire, lath, paper, cardboard, pipe, tires, ashes, refrigerators, motor vehicles, or parts of any of the foregoing.

---

**General Conditions** (continued)

7. This Permit is not final until all administrative appeal periods from this Permit have elapsed, or if such an appeal has been taken, until all proceedings before the Court have been completed.
8. No work shall be undertaken until the Permit has become final and then has been recorded in the Registry of Deeds or the Land Court for the district in which the land is located, within the chain of title of the affected property. In the case of recorded land, the Permit shall also be noted in the Registry's Grantor Index under the name of the owner of the land upon which the proposed work is to be done. In the case of the registered land, the Permit shall also be noted on the Land Court Certificate of Title of the owner of the land upon which the proposed work is done. The recording information shall be submitted to this Conservation Commission on the form at the end of this Permit, which form must be stamped by the Registry of Deeds, prior to the commencement of work.
9. Upon completion of the work described herein, the applicant shall submit a Request for Certificate of Compliance to the Conservation Commission.
10. The work shall conform to the plans and special conditions referenced in this Permit
11. Any change to the plans identified in the Permit above shall require the applicant to inquire of the Conservation Commission in writing whether the change is significant enough to require the filing of a new Application.
12. The Agent or members of the Conservation Commission shall have the right to enter and inspect the area subject to this Permit at reasonable hours to evaluate compliance with the conditions stated in this Permit, and may require the submittal of any data deemed necessary by the Conservation Commission.
13. This Permit shall apply to any successor in interest or successor in control of the property subject to this Permit and to any contractor or other person performing work conditioned by this Permit.
14. Prior to the start of work, and if the project involves work adjacent to a Bordering Vegetated Wetland, the boundary of the wetland in the vicinity of the proposed work area shall be marked by wooden stakes or flagging. Once in place, the wetland boundary markers shall be maintained until the Conservation Commission has issued a Certificate of Compliance.
15. All sedimentation barriers shall be maintained in good repair until all disturbed areas have been fully stabilized with vegetation or other means. At no time shall sediments be deposited in a wetland, water body or outside the limit of work. During construction, the applicant or his/her designee shall inspect the erosion controls on a daily basis and shall remove accumulated sediments as needed. The applicant shall immediately control any erosion problems that occur at the site and shall also immediately notify the Conservation Commission, which reserves the right to require additional erosion and/or damage prevention controls it may deem necessary. Sedimentation barriers shall serve as the limit of work unless another limit of work line has been approved by this Permit.

**Project location – 229 High Street**  
**FINDINGS**

**STANDARD CONDITIONS - STORMWATER**

1. All construction and post-construction stormwater management shall be conducted in accordance with supporting documents submitted with the Stormwater Bylaw Administrative Land Disturbance Review Application or the Land Disturbance Permit Application the Department of Environmental Protection's Stormwater Management Policy and by the Commission in this Stormwater Management Permit. (Note: Please review the Stormwater Management Policy). Specific conditions should describe the stormwater management system and could include the following:
  - A. Runoff shall be directed through vegetated swales before discharging into stormwater control structures.
  - B. All roof runoff except that from metal roofs shall discharge into drywells. Drywells shall be sized to accept the first one (1) inch of runoff (except where prohibited due to ground water conditions, etc. (see Stormwater Management Bylaw).
  - C. Catch basins shall be equipped with sumps, oil and gas traps, and shall be inspected and cleaned on a semi-annual basis. After each inspection and cleaning, the inspector shall provide to the Commission written confirmation that the inspection and cleaning were conducted.
  - D. All catch basin discharge points, or other point source discharge points, shall be rip-rapped to disperse stormwater energy.
  - E. Any underground drainage facilities must be designed with access sufficient to let a person enter the facility and to permit periodic cleaning.
2. All stormwater best management practices shall be maintained as specified in the Operation and Maintenance Plan submitted with the stormwater application and incorporated in the Stormwater Management Permit. Evidence of maintenance of the stormwater management system shall be provided to the commission on an annual basis. This condition shall be noted on the Certificate of Compliance (COC) and continue in perpetuity.
3. An annual maintenance report shall be provided to the Department of Public Works/ Town Engineer and the Conservation Commission by June 1<sup>st</sup> of each year reporting on the maintenance and operation procedures.
4. During construction, all drainage structures shall be inspected regularly and cleaned as necessary.
5. The installation of all drainage structures shall be witnessed by a registered professional engineer (civil). The engineer shall submit documentation to the Conservation Commission stating that he witnessed the installation of the drainage components and that each was installed correctly and in accordance with the manufacture's specifications. Failure to fully comply with this condition will result in a forfeiture of not less than 20 percent of any performance bond.
6. In the event groundwater is encountered during the installation of the infiltration structures, the applicant shall contact the Conservation Commission immediately to discuss alternative designs/solutions.
7. There shall be no increase in the post-development discharges from the storm drainage system or any other changes in post-development conditions that alter the post-development watershed

boundaries as currently depicted in the Stormwater Management Application and approved by this permit,

8. There shall be no sedimentation into wetlands or water bodies from discharge pipes or surface runoff leaving the site.
9. The applicants, owners, and their successors and assignees shall maintain all culvers, collection basins, traps retention and detention ponds, outlet structures, and other elements of drainage systems, unless put into an easement to the town, in order to avoid blockages and siltation which might cause failure of the system and /or detrimental impacts to on-site or off-site resource areas, and shall maintain the integrity of vegetative cover on the site.

***Site Specific Conditions for 229 High Street:***

1. All paved surfaces associated with this project must be kept clean at all times. All silt and debris should be swept up at the end of each work day.
2. Organic fertilizer must be used on the lawn in perpetuity.
3. Compost sock and orange construction fence are to be installed and inspected prior to start of work.
4. Infiltration system must be inspected by the Conservation Commission Office prior to backfill.
5. Upon completion of the retaining wall, the applicant must submit an engineer stamped letter certifying the structure and approvals from the Westwood Building Department.
