***INVITATION FOR BIDS***

**Oil Tank Removal  
Bid # SCH-23-B-002  
Addendum 02  
August 4, 2022**

**I. GENERAL INFORMATION**

Addendum 02 answers the following questions:

- Q8** Reference Addendum 01, Q2. If damage to the wall above the tank occurs, is the Contractor responsible for replacement/repairs? BHE strongly believes that a section(s) of the wall will more than likely be removed to remove the UST.
- A8** The Contractor is not responsible for wall replacement/repairs. However, if damaging the wall is necessary, the Contractor shall make all reasonable efforts to keep that to a minimum.
- Q9** If the tree is to be removed or significantly damaged, will the tree be required to be replaced? If so, please provide specifications on requirements for landscaping/tree replacement.
- A9** The Contractor is not required to replace the tree. However, the Contractor shall make all reasonable efforts to save the tree.
- Q10** Reference Addendum 01, Q6. Is re-paving the area where the UST is located to be removed to be included with both bid line items? If so, is curbing to be replaced if damaged or removed? The response to Q6 is unclear and contradictory.
- A10** The grammatically correct answer to the original question is No. The contractor is not responsible for the asphalt patching. However, the Contractor shall make all reasonable efforts to minimize asphalt and curbing damage.
- Q11** What is the required completion date? If we are not able to complete the work before the 2022-23 school year starts, is it acceptable to complete the work during a school vacation?
- A11** All work under this contract must be completed no later than August 31, 2022.
