C. General Conditions Under Massachusetts Wetlands Protection Act

The following conditions are only applicable to Approved projects.

- 1. Failure to comply with all conditions stated herein, and with all related statutes and other regulatory measures, shall be deemed cause to revoke or modify this Order.
- 2. The Order does not grant any property rights or any exclusive privileges; it does not authorize any injury to private property or invasion of private rights.
- 3. This Order does not relieve the permittee or any other person of the necessity of complying with all other applicable federal, state, or local statutes, ordinances, bylaws, or regulations.
- 4. The work authorized hereunder shall be completed within three years from the date of this Order unless either of the following apply:
 - a. the work is a maintenance dredging project as provided for in the Act; or
 - b. the time for completion has been extended to a specified date more than three years, but less than five years, from the date of issuance. If this Order is intended to be valid for more than three years, the extension date and the special circumstances warranting the extended time period are set forth as a special condition in this Order.
- 5. This Order may be extended by the issuing authority for one or more periods of up to three years each upon application to the issuing authority at least 30 days prior to the expiration date of the Order.
- If this Order constitutes an Amended Order of Conditions, this Amended Order of Conditions does not extend the issuance date of the original Final Order of Conditions and the Order will expire on 9/19/21 unless extended in writing by the Department.
- 7. Any fill used in connection with this project shall be clean fill. Any fill shall contain no trash, refuse, rubbish, or debris, including but not limited to lumber, bricks, plaster, wire, lath, paper, cardboard, pipe, tires, ashes, refrigerators, motor vehicles, or parts of any of the foregoing.
- 8. This Order is not final until all administrative appeal periods from this Order have elapsed, or if such an appeal has been taken, until all proceedings before the Department have been completed.

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

18. All sedimentation barriers shall be maintained in good repair until all disturbed areas have been fully stabilized with vegetation or other means. At no time shall sediments be deposited in a wetland or water body. During construction, the applicant or his/her designee shall inspect the erosion controls on a daily basis and shall remove accumulated sediments as needed. The applicant shall immediately control any erosion problems that occur at the site and shall also immediately notify the Conservation Commission, which reserves the right to require additional erosion and/or damage prevention controls it may deem necessary. Sedimentation barriers shall serve as the limit of work unless another limit of work line has been approved by this Order.

NOTICE OF STORMWATER CONTROL AND MAINTENANCE REQUIREMENTS

- 19. The work associated with this Order (the "Project") is (1) ☒ is not (2) ☐ subject to the Massachusetts Stormwater Standards. If the work is subject to the Stormwater Standards, then the project is subject to the following conditions:
 - a) All work, including site preparation, land disturbance, construction and redevelopment, shall be implemented in accordance with the construction period pollution prevention and erosion and sedimentation control plan and, if applicable, the Stormwater Pollution Prevention Plan required by the National Pollution Discharge Elimination System Construction General Permit as required by Stormwater Condition 8. Construction period erosion, sedimentation and pollution control measures and best management practices (BMPs) shall remain in place until the site is fully stabilized.
 - b) No stormwater runoff may be discharged to the post-construction stormwater BMPs unless and until a Registered Professional Engineer provides a Certification that: *i.* all construction period BMPs have been removed or will be removed by a date certain specified in the Certification. For any construction period BMPs intended to be converted to post construction operation for stormwater attenuation, recharge, and/or treatment, the conversion is allowed by the MassDEP Stormwater Handbook BMP specifications and that the BMP has been properly cleaned or prepared for post construction operation, including removal of all construction period sediment trapped in inlet and outlet control structures; *ii.* as-built final construction BMP plans are included, signed and stamped by a Registered Professional Engineer, certifying the site is fully stabilized;

iii. any illicit discharges to the stormwater management system have been removed, as per the requirements of Stormwater Standard 10;

iv. all post-construction stormwater BMPs are installed in accordance with the plans (including all planting plans) approved by the issuing authority, and have been inspected to ensure that they are not damaged and that they are in proper working condition; v. any vegetation associated with post-construction BMPs is suitably established to withstand erosion.

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

- g) The responsible party shall:
 - Maintain an operation and maintenance log for the last three (3) consecutive calendar years of inspections, repairs, maintenance and/or replacement of the stormwater management system or any part thereof, and disposal (for disposal the log shall indicate the type of material and the disposal location);
 - 2. Make the maintenance log available to MassDEP and the Conservation Commission ("Commission") upon request; and
 - Allow members and agents of the MassDEP and the Commission to enter and
 inspect the site to evaluate and ensure that the responsible party is in compliance
 with the requirements for each BMP established in the O&M Plan approved by the
 issuing authority.
- h) All sediment or other contaminants removed from stormwater BMPs shall be disposed of in accordance with all applicable federal, state, and local laws and regulations.
- Illicit discharges to the stormwater management system as defined in 310 CMR 10.04 are prohibited.
- j) The stormwater management system approved in the Order of Conditions shall not be changed without the prior written approval of the issuing authority.
- k) Areas designated as qualifying pervious areas for the purpose of the Low Impact Site Design Credit (as defined in the MassDEP Stormwater Handbook, Volume 3, Chapter 1, Low Impact Development Site Design Credits) shall not be altered without the prior written approval of the issuing authority.
- Access for maintenance, repair, and/or replacement of BMPs shall not be withheld.
 Any fencing constructed around stormwater BMPs shall include access gates and shall be at least six inches above grade to allow for wildlife passage.

Special Conditions (if you need more space for additional conditions, please attach a text document):					
See bylaw conditions					

wpaform5.doc • rev 12/23/09

151 Briar Lane FINDINGS

The Commission has reviewed the Notice of Intent plans and has held a Public Hearing on the Project. Based on the information available to the Commission at this time, the Commission has determined that the area on which the proposed work is to be done is significant to the following values set forth in Chapter 392, Westwood Wetlands Protection Bylaw (check as appropriate).

<u>X</u>	Public water supply		Flood control	_	Fisheries
$\underline{\mathbf{X}}$	Private water supply	<u>X</u>	Storm damage prevention	$\underline{\mathbf{X}}$	Wildlife habitat
$\underline{\mathbf{X}}$	Groundwater supply	<u>X</u>	Prevention of pollution	$\underline{\mathbf{X}}$	Erosion and sediment
	and quality				control

Furthermore, this Commission finds that the project is approved and that:

- 1. The site contains the following resource areas subject to protection under the Local Bylaw, Chapter 392: Bordering Vegetated Wetland.
- 2. The following conditions which are deemed necessary to protect the interests identified above. This Commission orders that all work shall conform to the approved Notice of Intent plan "SITE PLAN" dated 8/16/18, to the General Conditions defined under the special conditions attached to this Order. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Notice of Intent, these conditions shall take precedence.

STANDARD CONDITIONS

- This Order of Conditions applies to the applicant, the owner of the lot described in the Notice of
 Intent, and the successors and assigns of each. The Conservation Commission shall be notified in
 writing of any transfer in title to the Land or any change in contractor or developers before the
 Certificate of Compliance is issued. The notice shall include the name, address, and telephone
 numbers of the new owner or new contractor or developer, as well as a statement made under the
 penalties of perjury that the new owner or new contractor or developer has been provided with a
 copy of this order.
- 2. This Order shall be included in all construction contracts with contractors and subcontractors dealing with the work proposed and shall supersede all conflicting contract requirements.
- 3. A copy of this Order of Conditions and applicable plans shall be provided to each company doing work on the site and shall be available on the site at all times during construction.
- 4. Members of the Westwood Conservation Commission, and/or their designated representatives, shall, at reasonable times, have the right to enter upon and inspect the premises to evaluate compliance with this Order of Conditions.
- 5. The Applicant or owner shall be liable for any non-compliance with the Conditions of this Order or with any Condition that may survive the issuance of a Certificate of Compliance. The

day-to-day operations on site shall read and sign each page of a copy of the recorded Order. The purpose of this exercise is to insure that each and every Condition has been read and is understood. Questions relative to the meaning or intent of any Condition shall be clarified during the pre-construction meeting.

Only after the Applicant has satisfied the procedural requirements above shall the Applicant be allowed to begin construction.

Erosion Control and Pollution Prevention Measures

- 9. All erosion control measures shall be maintained in good condition at all times. Deteriorated erosion control measures shall be replaced as required, to maintain effectiveness for sediment interception. The Conservation Commission or their agent reserve the right to require additional erosion and/or damage prevention control at any time they are deemed appropriate. At no time shall any sediment be deposited in the wetland.
- 10. During all phases of construction, disturbed or exposed soil surfaces shall be brought to final finished grade and immediately stabilized. Bare ground that cannot be permanently stabilized within 30 days shall be loamed and seeded or stabilized with mulch.
- 11. No erosion control measures shall be removed until such removal is allowed by the Commission, or their agent, in writing, or if a Certificate of Compliance issues for the work conditioned herein, whichever comes first.
- 12. Dewatering of excavation shall be accomplished in the manner described by the attached sedimentation basin design to preclude the discharge of turbid water or sediment into any wetland or undisturbed buffer. The Commission and /or their Agent **must** inspect the sedimentation basin prior to use on site to insure compliance with this condition.
- 13. There shall be no stockpiling of soil, erodable materials and other debris within 50 feet of any Resource Area without the permission of the Conservation Commission.
- 14. No materials excavated from any area on the site shall be dumped into any Resource Area or Buffer Zone thereto.
- 15. During construction of the project, there shall be no discharge of fuel, oil, or other pollutants onto any part of the site. The Applicant shall take all reasonable precautions to prevent the release of pollutants by ignorance, accident, or vandalism. In the event there is a spill on the site, the Applicant shall immediately notify the Conservation Commission and the Board of Health.
- 16. Equipment fuel storage and refueling operations shall be situated in an upland area at a horizontal distance greater than 100 feet from the boundaries of the wetlands.

Changes in Plans

Continuing Conditions

- 24. As a continuing order of these conditions, even after a Certificate of Compliance is issued, no activity is permitted within the no-disturb buffer to the existing wetland including, but not limited to, the removal or cutting of vegetation.
- 25. As a continuing order of these conditions, if within two (2) years from the issuance of a Certificate of Compliance, erosion is evident on any slopes mitigating measures satisfactory to the Westwood Conservation Commission shall be taken.
- 26. As a continuing order of these conditions, even after a Certificate of Compliance is issued, no byproducts of landscaping may be placed within the no disturbance buffer zone, in the wetland area or flood plain.

Site Specific Conditions for 151 Briar Lane:

- All paved surfaces associated with this project must be kept clean at all times. All silt and debris should be swept up at the end of each work day.
- 2. Organic fertilizer must be used on the lawn in perpetuity.
- 3. Compost sock and orange construction fence are to be installed and inspected prior to start of work.
- 4. If dewatering is required a dewatering area or bag to catch the silt must be used.
- 5. The Commission can require the applicant install an infiltration system if runoff is flowing into the street or impacting surrounding properties.
