re: #150 Arcadia Road – Minor Modification
Assessors Map 35, Lot 179

Dear Mr. Petrozzi:

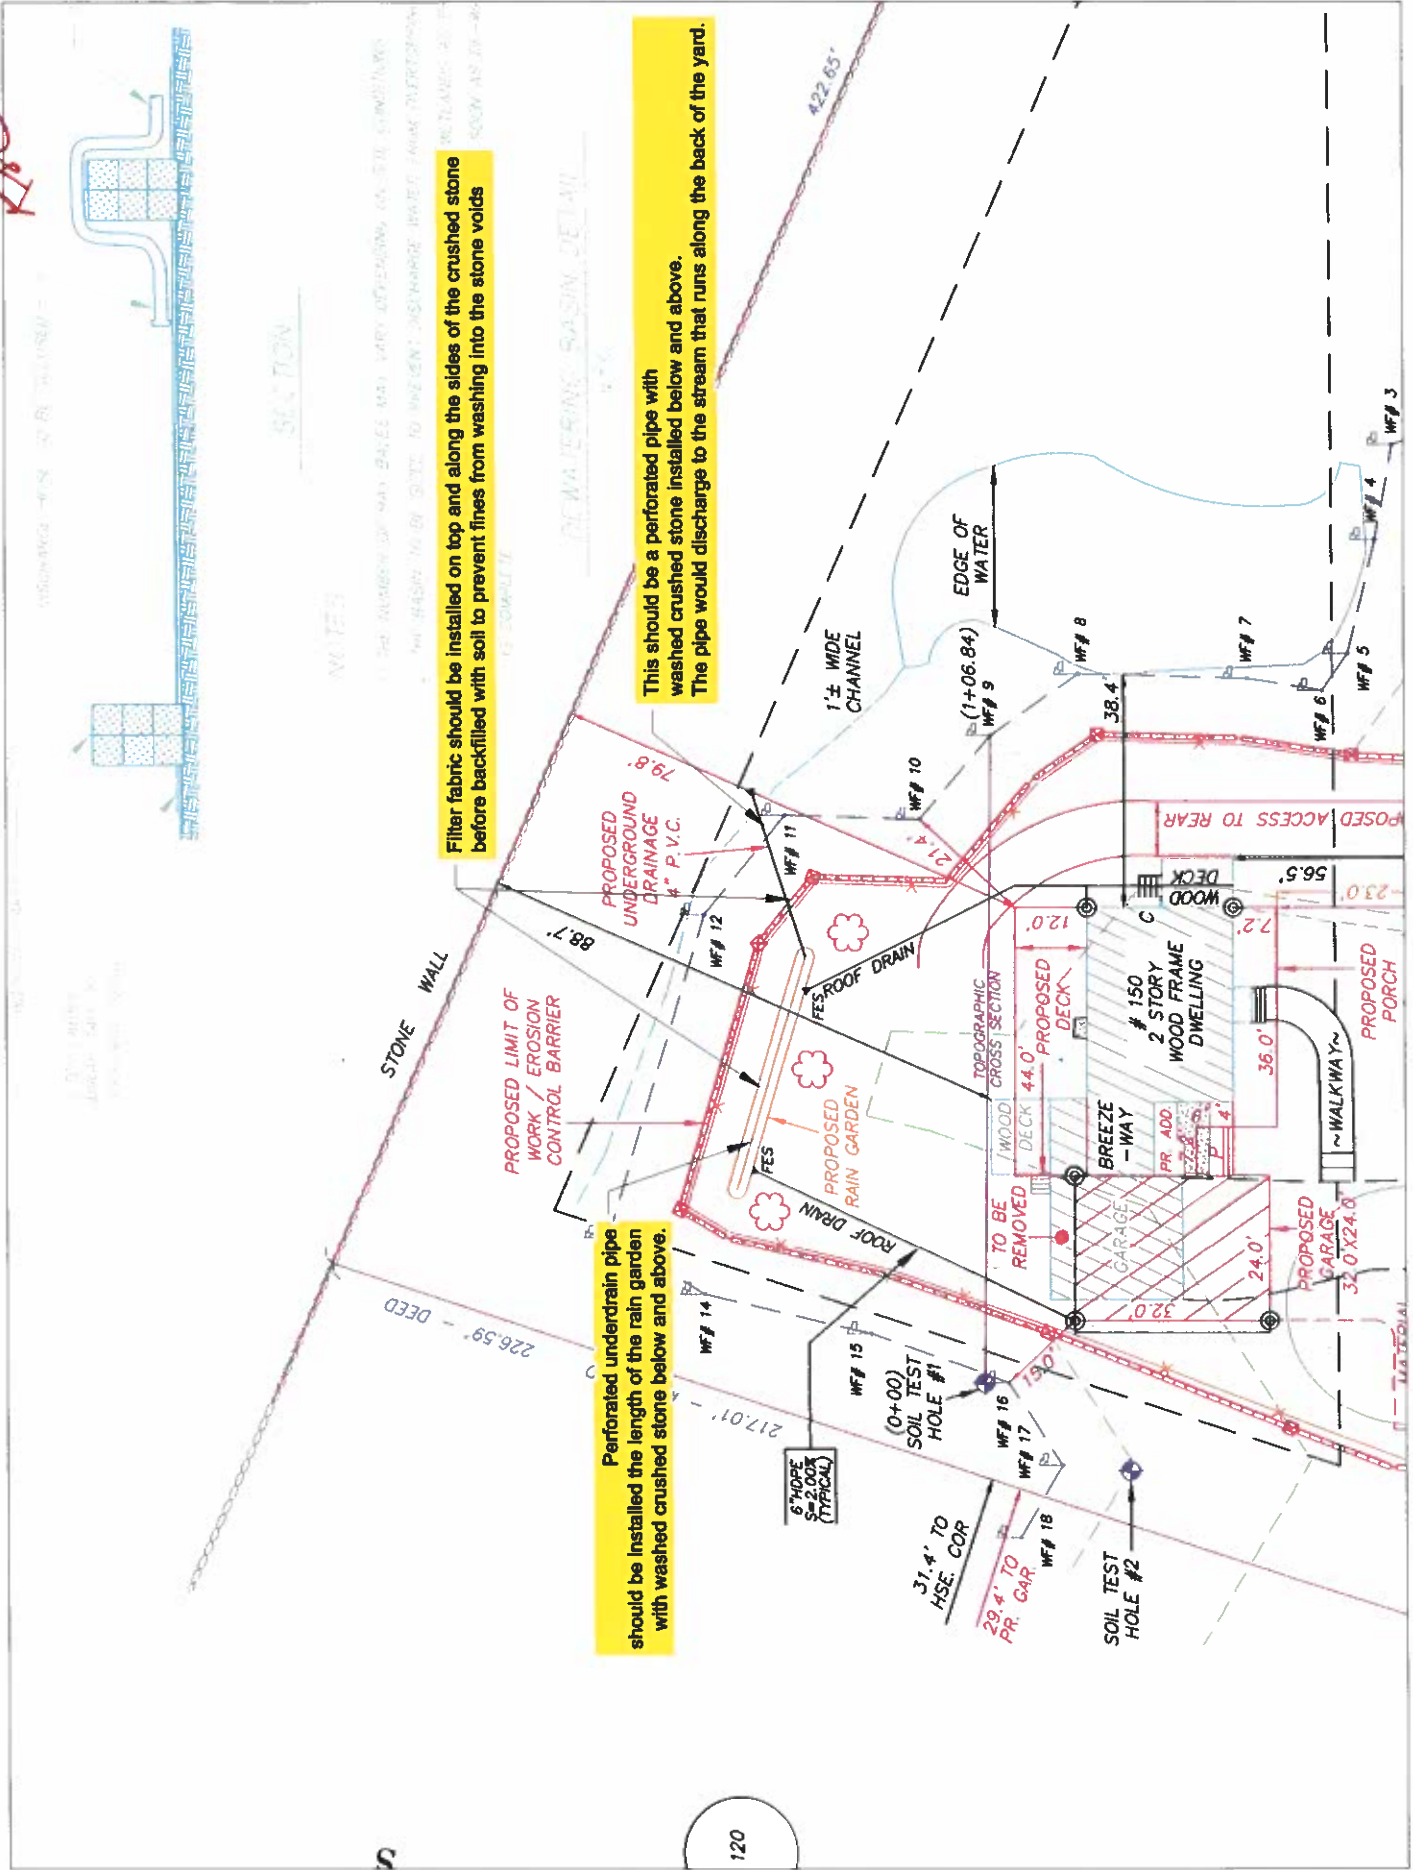

Please be advised that at their April 11, 2019 meeting, the Westwood Conservation Commission unanimously agreed that the proposed changes including installation of an underdrain in the raingarden to divert clean stormwater from roof drains and sump pump to the stream in heavy volume events as shown on the “sketch plan received 4/10/19” is not significant to the interest of the Wetland Protection Act or a significant change in the proposed approved plan and shall be considered a minor modification.

Should you have any questions or need additional information, please do not hesitate to contact me.

Thank you,

Karon Skinner Catrone
Conservation Commission Agent

Sketch Plan rec'd
4/10/19
KLL

Filter fabric should be installed on top and along the sides of the crushed stone before backfilled with soil to prevent fines from washing into the stone voids

Perforated underdrain pipe should be installed the length of the rain garden with washed crushed stone below and above.

This should be a perforated pipe with washed crushed stone installed below and above. The pipe would discharge to the stream that runs along the back of the yard.
